

Recommended Maintenance Procedure:

The following is our recommended **routine/frequent maintenance** and **cleaning steps** for using KG maintenance products. This procedure removes harmful carbon deposits and improves the longevity of your barrel while maintaining near ZERO accuracy. This procedure is recommended to be used after each use of the firearm:

- **Step 1:** KG-1 Carbon Remover
- **Step 2:** KG-3 Solvent and Degreaser (optional)
- **Step 3:** KG-4 Gun Oil
- **Step 4:** KG-5 Trigger Lube (as required)

The following is our recommended **occasional maintenance** and **cleaning steps** for using KG maintenance products. This procedure removes harmful carbon deposits and copper build up and can be used after a few hundred rounds or when there is an opportunity for fouling shots:

- **Step 1:** KG-1 Carbon Remover
- **Step 2:** KG-12 Bore Cleaner
- **Step 3:** KG-3 Solvent and Degreaser (optional)
- **Step 4:** KG-4 Gun Oil
- **Step 5:** KG-5 Trigger Lube (as required)

The following is our recommended **Break-in** procedures using KG products. These steps can also be used where **reducing the need for fouling shots** is required or **after a few hundred rounds** through the barrel.

- **Step 1:** KG-1 Carbon Remover
- **Step 2:** KG-2 Bore Polisher
- **Step 3:** KG-3 Solvent and Degreaser
- **Step 4:** KG-4 Gun Oil
- **Step 5:** KG-5 Trigger Lube (as required)
