

TAC LINK

110-4200-XXXX

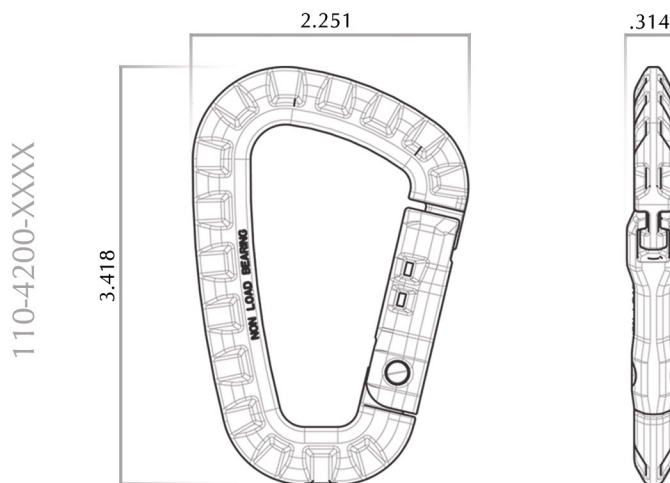

The Tac Link is a high strength polymer attachment device with GhillieTEX™ I.R. Signature Reduction Technology. This product has considerable weight and cost savings over metal climbing carabiners. All of the external components are high strength molded polymer, which eliminates metal noise and paint scratches. The Tac Link is your answer for a low cost, high strength, weight saving attachment point for any of your accessories.

- GhillieTEX™ IR signature reduction technology
- Corrosion resistant stainless steel gate spring
- High strength polymer design
- Weight savings compared to metal carabiner
- Resistance to solar heating
- Textured grip for use with wet/gloved hands
- Large latch opening eliminates snags
- Eliminates metal-on-metal noise and paint scratches
- Use for securing tactical accessories
